Algebra I Common Core Regents Review

For students preparing to take the exam in January

Many students will be taking or retaking the Algebra I Regents exam on January 28, 2016.

The new Common Core math standards have presented a new challenge to math students, and plenty of controversy. In New York State, more than 200,000 students opted out of Common Core exams. However, high school students cannot opt out of the Regents exams because they're required for graduation.

Let us help you prepare for this challenging exam with experienced guidance from **Mr. Allen Ma**, a veteran math teacher from JFK High School in Bellmore, NY. Mr. Ma has taught Common Core Algebra I since its inception and has developed accessible content, instructive practice questions, and successful strategies for this exam!

Sunday, January 17, 2016 from 9am - 4pm
at Farmingdale State College, Gleeson Hall

Course fee: \$160

SAT Crash Course

Prepare for the current SAT format one last time

Many students are deciding whether to take the current SAT exam or to wait for the new SAT to debut in March. The current SAT is familiar to most students, and there are countless review resources available. The New SAT, however, is largely a question mark.

If you'll be tackling the current SAT one last time, we can help get you ready. Come join **Mr. Josh Fialkow**, a social studies teacher who also tutors students in math, chemistry, social studies, and SAT Math and English. His students have averaged a 300 point increase on their SATs.

We and Mr. Fialkow have developed our SAT Crash Course to bring his successful strategies to the classroom!

*All students in attendance will receive a custom SAT workbook.

Sunday, January 17, 2016 from 9am - 4pm
at Farmingdale State College, Gleeson Hall

Course fee: \$240
